Corona Virus 19 - Endorsement

Attaching to Expatriate Group TravelCare policies purchased on or after 20th September 2021, where this endorsement has been provided to the insured by us.

Expatriate Group - TravelCare

This endorsement is to expand the benefit of the Emergency Medical Evacuation and Emergency and Accidental Medical Treatment sections of the policy, to provide cover for the treatment of Covid 19, for those persons who are fully vaccinated against Covid 19 (travelling at least 2 weeks after receiving a completed course of vaccination(s) or medically recommended booster vaccination(s)).

This endorsement only covers vaccinations approved by the World Health Organisation and administered by a medical professional, where there is evidence of the vaccination(s) or booster vaccination(s) being administered.

This endorsement only applies to persons following all appropriate government medical advice in both your country of residence and any country you are visiting.

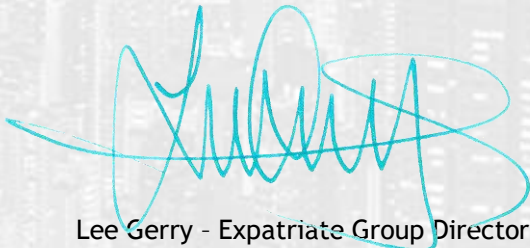

This endorsement only covers Covid 19 tests because of a request made by a medical professional due to appropriate symptoms being present. It does not cover tests performed as a pre-travel requirement or any routine screening.

Note that the pre-existing medical exclusion [see General Exclusion 1 of your policy wording] would still apply and therefore an exacerbation of a pre-existing condition as a result of Covid would not be covered by your policy.

This policy does not cover the cost of quarantine or self-isolation or any associated costs including, but not limited to, costs for prolonging your trip, subsistence, change of travel plans or loss of enjoyment.

This endorsement does not extend to the Cancellation and Curtailment Benefit Options.

Effective 20th September 2021.

Lee Gerry - Expatriate Group Director
